DESCRIPTION OF MAP UNITS

Geologic units, geologic and landforms, land use, and water bodies are shown on the map. The map is designed to illustrate the geology of the area and the location of water bodies, land use, and landforms. The map also shows the location of water bodies and land use, as well as the location of landforms and geologic units.

The map is intended to be used as a reference for the determination of the location of water bodies, land use, and landforms. The map is also intended to be used as a reference for the determination of the location of geologic units.
